

Ethereum Docs

Credit Card:

****Step 1: Purchase Using Credit Card****

- Navigate to ChangeNow.
- Select your desired currency pair, e.g., USD/ETH.
- Specify the amount in ETH you intend to buy and press "Buy."
- Copy your wallet address from MetaMask and paste it into the "Recipient Wallet" field.
- Review the exchange details carefully, focusing on your wallet address. Read and accept their terms of use and privacy policy. If all looks good, hit "Confirm."
- You'll be taken to the partner platform, Guardarian.
- Choose your payment method, review the terms and privacy policy again. If you consent, click "Continue."
- Input your email to receive a confirmation code.
- Enter your personal and credit card information accurately for identity verification later. Click "Confirm."
- Based on your bank's procedure, you might need to validate the card payment within its app.
- Finally, verify your identity by selecting your country and preferred method. Upload a clear photo of the requested ID and a selfie.
- After identity verification, wait for your ETH in your MetaMask.
- Done! You now possess ETH.

****Step 2: Convert ETH to HEX****

- Launch HEXscout Swap.
- Decide the amount of ETH you'd like to exchange for HEX. **Reserve a bit of your ETH for future stakes (approximately \$70 worth).**
- Click "Swap."
- A MetaMask popup will appear. Confirm it.
- After a brief wait, your HEX order will be confirmed. You've successfully acquired HEX.
