

1. [Sign in](#) to your Kraken account.
2. Click on the Verify identity button on the home page.
3. Enter your details on the Verify your identity form and click Continue. Note: the field headers on the form may differ slightly depending on your location.
4. On the next page, enter your occupation and other details. Click Continue.
5. Next choose your identity document type and either upload the document or capture it on the webcam. If you don't have the document at-hand, you can pause the identification verification at any point and resume by following the same steps as above.

*Keep this in the pink box:* Please note that for Kraken's automated verification process, it is imperative that all images uploaded must be of high quality. Otherwise, the automated verification process may fail, which could delay the procedure.

6. Once the document is uploaded, click Continue to return back to the home page of your account.
7. You'll be notified once the verification is complete.
