

PulseChain Docs

Credit Card:

****Step 1: Purchase Using Credit Card****

- Navigate to ChangeNow.
- Select your desired currency pair, e.g., USD/ETH.
- Specify the amount in ETH you intend to buy and press "Buy."
- Copy your wallet address from MetaMask and paste it into the "Recipient Wallet" field.
- Review the exchange details carefully, focusing on your wallet address. Read and accept their terms of use and privacy policy. If all looks good, hit "Confirm."
- You'll be taken to the partner platform, Guardarian.
- Choose your payment method, review the terms and privacy policy again. If you consent, click "Continue."
- Input your email to receive a confirmation code.
- Enter your personal and credit card information accurately for identity verification later. Click "Confirm."
- Based on your bank's procedure, you might need to validate the card payment within its app.
- Finally, verify your identity by selecting your country and preferred method. Upload a clear photo of the requested ID and a selfie.
- After identity verification, wait for your ETH in your MetaMask.
- Done! You now possess ETH.

****Step 2: Exchange ETH for WPLS****

1. Navigate to `HEXscout Swap`.
2. Determine the amount of WPLS you wish to obtain with ETH. It's crucial not to exchange all your ETH; retain a minor portion for subsequent steps (approximately \$20 worth of ETH is recommended).
3. Select "Swap."
4. MetaMask will prompt you next. Opt for "Confirm."
5. Allow a brief moment for processing. Once complete, you'll receive a confirmation. Bravo! You've successfully acquired WPLS.

****Step 3: Bridge Your Funds to PulseChain****

1. Visit `bridge.PulseChain.com`.
2. Select the "Connect Wallet" button.
3. Opt for MetaMask and confirm within MetaMask to proceed.
4. Specify the amount of WPLS you wish to bridge. It's advisable to select 100%.

5. Ensure the "Receive PLS" toggle is active.
6. Confirm your choice by selecting "Send."
7. Proceed by selecting "Authorize bridge to access X WPLS" and confirm again within MetaMask.
8. Patiently wait for your allowance to be confirmed on-chain. Subsequently, select "Send" once more and confirm in MetaMask.
9. Allow some time for your transaction to process. You should receive PLS within a span of 15-20 minutes.

****Step 4: Integrate PulseChain with MetaMask****

1. Choose the button below to incorporate the PulseChain network configuration in MetaMask. Confirm your action within MetaMask.

****Step 5: Exchange PLS for HEX****

1. Navigate to `GoPulseX`.
2. Hit the "Connect Wallet" button.
3. The PLS/HEX pair will be pre-selected. Determine the amount of PLS you intend to swap for HEX. It's crucial not to exchange all your PLS; retain a minor portion for subsequent steps (approximately \$5 worth of PLS is recommended).
4. Click on "Swap" and validate the transaction within MetaMask.
5. Bravo! You've successfully acquired HEX.

Wire Transfer

****Step 5: Buy ETH on Kraken****

- Head to the "Trade" tab.
- Choose your currency pair.
- Fill the order details and click "Buy."
- Review your order, then submit.
- Kudos! You've bought ETH on Kraken.

****Step 6: Kraken ETH Withdrawal****

- From "Funding" in Kraken, click "Withdraw."
- Search for Ethereum and choose "Add Ethereum address."
- Retrieve and paste your Ethereum address from HEXscout.com.

- Verify the new address via email.
- Withdraw the desired amount, preferably 100% of your ETH.
- Double-check details and confirm the withdrawal.
- If asked, provide the 2FA verification code.
- Your ETH should soon be in your wallet. Well done!

****Step 7: Exchange ETH for WPLS****

1. Navigate to `HEXscout Swap`.
2. Determine the amount of WPLS you wish to obtain with ETH. It's crucial not to exchange all your ETH; retain a minor portion for subsequent steps (approximately \$20 worth of ETH is recommended).
3. Select "Swap."
4. MetaMask will prompt you next. Opt for "Confirm."
5. Allow a brief moment for processing. Once complete, you'll receive a confirmation. Bravo! You've successfully acquired WPLS.

****Step 8: Bridge Your Funds to PulseChain****

1. Visit `bridge.PulseChain.com`.
2. Select the "Connect Wallet" button.
3. Opt for MetaMask and confirm within MetaMask to proceed.
4. Specify the amount of WPLS you wish to bridge. It's advisable to select 100%.
5. Ensure the "Receive PLS" toggle is active.
6. Confirm your choice by selecting "Send."
7. Proceed by selecting "Authorize bridge to access X WPLS" and confirm again within MetaMask.
8. Patiently wait for your allowance to be confirmed on-chain. Subsequently, select "Send" once more and confirm in MetaMask.
9. Allow some time for your transaction to process. You should receive PLS within a span of 15-20 minutes.

****Step 9: Integrate PulseChain with MetaMask****

1. Choose the button below to incorporate the PulseChain network configuration in MetaMask. Confirm your action within MetaMask.

****Step 10: Exchange PLS for HEX****

1. Navigate to `GoPulseX`.

2. Hit the "Connect Wallet" button.
3. The PLS/HEX pair will be pre-selected. Determine the amount of PLS you intend to swap for HEX. It's crucial not to exchange all your PLS; retain a minor portion for subsequent steps (approximately \$5 worth of PLS is recommended).
4. Click on "Swap" and validate the transaction within MetaMask.
5. Bravo! You've successfully acquired HEX.
